<p><a href="#">Tassomai</a></p> 	Science	Y11	Tassomai is an online quizzing tool linked to AQA GCSE Science content and is adaptive to students' ability with an impressive evidence base around impact for those who engage with this platform effectively. This is being offered to LJS Y11 students as an additional, <b>optional</b> revision tool that can be provided to students <b>for a fee</b> . Price and account details will be provided by the Science Department.

### Students' Microsoft Office 365 Usernames and Passwords

All students' **usernames** will have a number at the beginning (this corresponds to the year they started LJS in Y7), followed by their surname and the first letter of their surname. In addition, when logging onto devices outside of school students will need to include within their username @laurencejackson.org (so basically their school email address). Example below. **Students set their own passwords.** If they forget their password, they need to notify their form tutor and ask for help in getting their password reset or visit the IT Support office in school and ask for a reset. Ultimately students need to get into good habits with remembering their password so that forgetting their password doesn't become a barrier to engagement with their home learning.
